KDC®280
Bluetooth Barcode Scanner & Data Collector

Rugged ▸ Powered ▸ Designed ▸ Connected ▸ Equipped ▸

This miniature Bluetooth Low Energy barcode scanner is the culmination of decades of engineering and human-centered design experience focused on maximizing efficiency and minimizing costs of auto-identification in any industry.

Rugged
The KDC280 is IP65-rated and has a 5' drop spec. This means the device is dust tight and water resistant; it's ideal for any environment.

Powered
Advanced power management puts the scanner in "hibernation mode" when not actively in use, allowing the battery to outlast an average work shift. When power does run out, the KDC280 can be charged via USB or charging cradle.

Designed
Like its predecessors, the KDC280 is small enough to fit in your pocket and light enough to wear on a lanyard around your neck for a full day without strain. The 1" OLED display and 3-button design make interacting with your device easier than ever; no need to decode flashing colored lights to determine if your data was collected – you can view it right on the screen!

Connected
The KDC280 features Bluetooth® Low Energy to enable faster and simpler connection methods for use with smart watches, smart glasses, and other wearable smart devices. When connected via the BLE profile, users will experience low power consumption and fast data transmission while maintaining an uncompromised connection.

Equipped
Available in 1D Laser, 1D CCD, and 2D Imager models the KDC280 is able to read all major symbologies. 5MB of on-board memory stores over 250,000 barcodes and allows basic applications to run right on the device.

KTSync® software with keyboard wedging, application generation, database look up, inventory management, and KDC configuration features is included for Android, iOS, and Windows devices. Complementary SDK and technical support from top engineers and the development team ensure ease of data collection in any situation.
