

KOAMTAC Announces the KDC350F, an IP65 Rated Wi-Fi Bluetooth Barcode Scanner and NFC Reader

KOAMTAC® expands the IP65 rated KDC®350 series and announces the release of the new, KDC350F (Wi-Fi model). The KDC350F is designed for users who require long range, cost efficient, wireless barcode scanning solutions in a wide variety of applications, including warehouse management, factory automation, retail and healthcare.

July 21, 2015, Princeton, NJ - KOAMTAC®, Inc. today announced the release of the KDC®350F, an IP65 rated Wi-Fi Bluetooth barcode scanner and Near Field Communication (NFC) reader. Encompassing the same superior quality of the KDC350 series, it is one of the most unique and rugged products KOAMTAC has to offer.

The KDC350F enables the user to connect to a private local area network (LAN) and transmit data in real time. The combination of Wi-Fi capability and real time data collection make it ideal for various applications, including warehouse management, factory automation, retail and healthcare. With a Wi-Fi connection, users are no longer restricted to a specific location, enabling them to transmit data seamlessly and directly to the server without requiring a host device.

“Customers will no longer have to use a heavy industrial scanner or industrial PDT for simple data entry or retrieval work in factory, warehouse, store floor and hospital environments. The KDC350F will provide true mobility to workers at an affordable price range,” stated Dr. Hanjin Lee, President and CEO of KOAMTAC, Inc.

The KDC350F is available in 1D laser and 2D imager models, with additional NFC options. Also available is a 1-slot and 4-slot cradle solution that conveniently charges multiple KDC350 scanners simultaneously, built for any environment.
