

## KOAMTAC DEVELOPER PROGRAM

One Package for all Applications  
Barcode Data Collection, RFID, & Payment

The KOAMTAC Developer Program provides the information and support you need to develop applications for use in barcode scanning, RFID, and payment solutions. KOAMTAC's robust SDK enables the user to integrate support for all these features into mobile applications.

The KOAMTAC KDC has superior power management system. The miniature, ultra-slim design includes a unique system that allows several days of operation from a fully charged state.

All KDC® Bluetooth models have been proven and integrated into all major smart devices. The KDC400/450/500 series have a unique modular and detachable SmartSled® design for all major smart devices for maximized data collection and payment process performance.

-  FREE 60 day trial on demo units
-  FREE SDK & mobile application integration
-  Collaborative marketing opportunities & listing on koamtac.com
