Barcode Scanner Company KoamTac, Inc. Adds Samsung Galaxy SIII, Apple iPhone 5 and Pantech Vega Racer Smartphone Cases

The release of smartphone cases for the Samsung Galaxy SIII, Apple iPhone5 and Pantech Vega Racer, brings to eight the number of custom cases that allow users to use their smartphones as a barcode scanner in conjunction with their KDC200, KDC250, KDC300, and KDC400 programmable Bluetooth barcode and card readers. KoamTac also plans to release smartphone cases for the Apple iPod touch 5G and Samsung Galaxy Note2 in November 2012.

Princeton, NJ, October 10, 2012

Barcode scanner company KoamTac, Inc. (http://www.koamtac.com/) today took another step toward helping companies save money while keeping up with rapidly changing technology with the release of three more smartphone cases made to work with its innovative suite of Bluetooth barcode data and card readers.

KoamTac announced the release of smartphone cases for the Samsung Galaxy SIII, Apple iPhone5 and Pantech Vega Racer, bringing to eight the number of custom cases that allow users to use their smartphones as a barcode PDA in conjunction with their KDC200, KDC250, KDC300, and KDC400 programmable Bluetooth barcode scanners.

KoamTac also plans to release smartphone cases for the Apple iPod touch 5G and Samsung Galaxy Note2 in November 2012.

Cases already are available for the Samsung Galaxy SII, the Samsung Player 5, Samsung Note, Apple iPhone 4(S) and Apple iPod touch 4G.

"Consumers today have an insatiable appetite for the latest and greatest smartphone technology, which is why it keeps changing so quickly, but it is very expensive and difficult for most companies to keep pace," said Dr. Hanjin Lee, CEO and president of KoamTac.

He noted that barcode data and card reader technology does not change as quickly.

"Our products provide robust Bluetooth scanning technology that works seamlessly with virtually every technology platform. The versatility of our scanners and sleds means that companies can keep up with quickly evolving smartphones without having to invest each time in new barcode data and card reader technology. The result is a huge savings in money and time and added convenience. With the release of each new smartphone, we have the ability to move quickly and produce a new case to deliver smart solutions for our clients."

The KoamTac suite of smartphone cases, scanners and barcode sleds—available with or without an MSR –means that businesses now have three new powerful scanning solutions – an iPhone5 barcode and card reader, Samsung Galaxy SIII barcode and card reader, and Pantech Vega Racer barcode and card reader – to meet their data collection, transfer and storage needs, and to help them grow and prosper.

About KoamTac, Inc.:

KoamTac, based in Princeton, New Jersey, produces a signature line of lightweight, ergonomically-friendly Bluetooth barcode scanners that are universally compatible across today's technology platforms, working seamlessly with Android, Blackberry, iPhone/iPod touch/iPad, Mac and Windows.

The KDC100, KDC200, KDC250, KDC300, and KDC400 barcode sleds are the world's smallest and lightest programmable barcode data and card readers with a display on the market today. For additional information, go to http://www.koamtac.com.
